SUMMARY

Results-driven Software Engineer with 9+ years of experience designing, building, and scaling web applications across diverse industries. Proven track record of delivering high-performance RESTful APIs and microservices using Node.js, React, Next.js, and AWS cloud infrastructure. Skilled at translating complex business requirements into clean, maintainable code following Feature Sliced Design and Clean Architecture principles. Passionate about test-driven development and mentoring junior engineers to elevate team capability.

CORE SKILLS

WORK EXPERIENCE

Software Engineer

February 13, 2023 – April 23, 2026

Prosource Global BPO Inc. (Bevz)

- Architected and developed an enterprise admin tool from the ground up
- Integrated multiple third-party delivery service APIs (end-to-end)
- Designed and implemented new features across backend microservices and frontend modules, consistently meeting sprint deadlines
- Refactored legacy REST API endpoints into a layered architecture, improving code maintainability and scalability
- Collaborated with a cross-functional team of 8+ engineers, product managers, and designers across US and PH time zones

Full Stack Developer

June 1, 2020 – February 10, 2023

Mosed Corporation

- Served as interim team lead for a development team, coordinating sprint planning, code reviews, and deployments
- Maintained and enhanced backend RESTful API microservices and a CMS platform
- Maintaining existing AWS infrastructure
- Collaborated closely with other team member to plan, design, and develop robust solutions
- Plan, design and develop database for system enhancement

Full Stack Developer

October 1, 2018 – May 29, 2020

W-Tech Solutions (New Oriental Club 88 Corporation)

- Monitoring online casino game and chat system
- Maintaining and modified existing back-office web application
- Implemented advanced features on chat system
- Developed a RESTFUL API for frontend game application
- Plan, design and develop database for system enhancement

Software Developer

January 2, 2017 – July 20, 2018

Tranzend Solution and Trading Corporation

- Provide mentoring services to newly developers as needed

- Collaborated closely with other team member to plan, design, and develop robust solutions
- Plan, design and develop database for software requirements
- Design, develop and implemented API for SMS software system
- Research, design and implement a friendly user and advanced Google Maps Monitoring and Tracking System

PROJECTS

Own. - Social Media App

- Designed and built an administrative web application to configure, monitor, and track user credits
- Developed new feature for gifting, wallet and livestream management
- Integrated third party websocket platform for real-time ranks updates

Muse Systems - AI Relationship Engine for Med Spas

- Responsible for end-to-end frontend and backend development
- Integrated Google Calendar and third party API to automate schedule synchronization, improving scheduling accuracy and reducing manual input

Safety Crew Software – Health and Safety Management System

- Designed and delivered a scalable Health and Safety Management System, improving incident tracking, compliance, and operational visibility
- Built centralized dashboards to monitor safety metrics and improve visibility across operations

Patient Monitoring – Smart Watch Application with Alarm and SMS Notification for COVID-19 Patient with Geo-Mapping

- Integrated SMS notification system to ensure timely communication during emergencies
- Built geo-mapping functionality to track patient location and support rapid response and monitoring

ELS Philippines Inc. – Automated Washing Machine System

- Contributed to the development of an automated washing machine system, focusing on CRUD operations and backend data handling
- Worked closely with the development team to debug issues and improve application performance

KALINGAPP – Geo-Mapped Incident Monitoring System (Web & Android)

- Developed backend APIs and web application modules for a geo-mapped incident monitoring system, enabling real-time reporting and tracking
- Developed backend APIs and web application modules for a geo-mapped incident monitoring system, enabling real-time reporting and tracking

EACOMTECH INC. – Content Management System (CMS) for Dynamic Website

- Served as a core Full-Stack Developer in building a CMS-driven website with dynamic content management
- Implemented admin dashboard features for managing website pages, media, and structured content

EDUCATION

Bachelor of Science in Information Technology

Lyceum of the Philippines University Manila

2014 – 2016

Bachelor of Science in Information Technology

AMA Computer University

2013 – 2014

Bachelor of Science in Information Technology Specialization of Animation and Game Developer

Far Eastern University - EAC

2012 – 2013
